The administration, guidance department, and teaching staff have contributed to this document; their work has resulted in what we hope is a very informative and complete guide to academics at Princeton Community High School. For additional information related to courses in the subject areas, please contact the Guidance Counseling Office.
High School Glossary

AP Courses – Classes offered to high school juniors and seniors that may count as high school and college credit. A specific score on an AP final exam determines college credit.

Core 40 Diploma – High school “core” subjects required for admission to most Indiana colleges/universities and recommended for training and careers. Completion of Core 40 will influence college financial aid as well.

Core 40 with Academic Honors – A rigorous curriculum designed by the State of Indiana. Specific courses, grades, and GPA are required, including 47 credits, 3.0 GPA, and no semester grade lower than a C-. AP classes, dual credit, and/or minimum SAT/ACT scores are also required.

Core 40 with Technical Honors – A rigorous curriculum requiring 47 credits and completion of a career-technical program with state certification and a GPA of 3.0 with no grade below C-. Dual credits, at least 6 technical courses, and passing the Work Keys exam also required.

Credit – Awarded for successful completion of a semester course (1 period/ day).

Dual Credit – High school course which follows college curriculum and results in both high school and college credit. Please see the Dual Credit Offerings spreadsheet on the guidance site for courses offered as dual credit.

Electives – Non-required courses taken to achieve credit for graduation.

Grade point average – The point value of all semester grades divided by the number of GPA credits. See Agenda Book.

NCAA Eligibility Center – Students who wish to compete at Division I, II, or III levels of college athletics must register to have classes evaluated for eligibility. Specific requirements are listed on the NCAA Eligibility Center website. www.eligibilitycenter.org

Harmony Parent Connect – gives parents access to grades, attendance, etc., for their student. Information located on the NGSC website.

PCHS Planner/Agenda Book – A book that each PCHS student receives on the first day of school. This book contains vital information such as school rules and policies, internet agreement, emergency card, calendar, etc.

PCHS Website –contains announcements, guidance news and scholarship information, teacher sites, etc. http://ngsc.k12.in.us/guidance-department

Prerequisite – Course required to be completed before another course is taken.

Requirement – Course students must pass to receive a diploma/graduate.

Transcript – A permanent record of courses completed Grades 9-12. It includes semester grades received, attendance, GPA, class rank, credits, and test scores.
Graduation Pathways Parent Overview

What?

Graduation Pathways: Students must meet at least one requirement in each bucket

Bucket #1  Earn at least one diploma designation

Bucket #2  Learn and Demonstrate Employability Skills through experiential learning
   *All experiences require students to create a work-product that demonstrates their development of employability skills such as a presentation, portfolio, or letter of employment verification.*

Bucket #3  Satisfy as least one Postsecondary-Ready Competency

Who/When?

- Becomes a requirement for our current 8th grade students (Class of 2023).
- Current 9th, 10th, 11th, and 12th grade students may use Graduation Pathways to graduate if offered by the school.

Why?

- Approved by the State Board of Education in December 2017.
- Align graduation requirements to prepare students for careers and college in a more personalized manner.
- Students have options, moving away from the “one size fits all” approach.
- Requirements encourage students to develop their professional/employability skills such as teamwork, organization, perseverance, time management, decision-making, and pride in work.

Frequently Asked Questions

1. Does my student still have to take the ISTEP+?

   *All students should take the ISTEP+ Grade 10 during their grade 10 year, regardless of whether they pursue Graduation Pathways. Beyond grade 10, there is no requirement for the student to continue to retake the assessment, if pursuing the Graduation Pathways in lieu of the graduation exam.*

2. How do students “opt-in” to Graduation Pathways?

   *As long as a school offers Graduation Pathways as an option for students, then students can “opt-in”. There are new fields in the Graduation Report to indicate which Graduation Pathway Requirement options students have satisfied.*

3. Where can I find out more about Graduation Pathways including resources and more in-depth information?

   *Visit https://www.doe.in.gov/graduation-pathways to learn more.*

Weighted Grades - Beginning with the class of 2019, grades in selected courses will be earned on a 4.5 point scale rather than the standard 4.0.

## Miscellaneous
NCAA Eligibility Requirements
Indiana Diplomas **Extremely important when choosing courses.
HIGH SCHOOL GRADUATION

Graduation: It is the responsibility of each student to plan with his or her parents and counselor for graduation. Seeing that all required courses and total credits are in order is the responsibility of each student. Graduation checklists are on file in the Guidance Counseling Office, but the ultimate responsibility to meet all graduation requirements lies with the student and parent/guardian. The State of Indiana requires each student beginning with the Class of 2011 to complete a Core 40 curriculum. Students who are unable to meet these requirements must meet with the principal, counselor, and parent to discuss “Opting Out” of the Core 40 and receiving a General High School Diploma.

Core 40 End-of-Course Assessments: Beginning with the Class of 2019, students are required to pass the ISTEP+ Grade 10 Math and English Language Arts assessments. Students who do not achieve a passing score on one or both of the sections may be eligible for a waiver if the following requirements are met:

1) Take ISTEP+ test each testing window for each subject in which the student did not receive a passing score at least one time each school year.
2) Complete remediation opportunities provided by the school.
3) Maintain a high school attendance rate of 95% with excused absences not counting toward the rate.
4) Maintain a “C” average in the courses specifically required for graduation.
5) Obtain a written recommendation, supported by documentation that the student has met the academic standard measured by ISTEP+ assessment, from a teacher of the student in each subject area in which the student has not achieved a passing score and concurrence by the principal with the recommendation.

Princeton Community High School will administer the ISTEP+ only to students currently enrolled at PCHS. Individuals who are enrolled in a fulltime home school are not eligible for testing at PCHS.

Testing information is available directly from the Indiana Department of Education at:
http://www.doe.in.gov/assessment/end-course-assessments-ecas

POLICIES RELATED TO SCHEDULING

Course Scheduling: Students will meet with their counselors to enroll. Parents may also schedule appointments with their son’s or daughter’s counselor. Schedules will be final after approved by the PCHS Guidance Counselors by the first day of the new school year, unless a change is mandated by the school principal.

Schedule Change: Students are expected to give careful consideration to course selections when they are made. ONCE A STUDENT HAS TURNED IN THEIR SIGNED Registration Confirmation Sheet, SCHEDULE CHANGES WILL BE MADE FOR THE FOLLOWING REASONS ONLY: 1) computer input error, 2) course cancellation, 3) course conflict, and 4) failure to meet a prerequisite. After school begins, NO SCHEDULE CHANGE WILL BE MADE EXCEPT WITH ADMINISTRATIVE APPROVAL.

Minimum Credit Load: All students must enroll in seven classes each semester; exceptions will be made only with administrative and guidance counseling approval or for those Juniors and Seniors who are enrolled in advanced classes; other exceptions will include students who have Individual Education Plans.
ITEMS TO CONSIDER WHEN DESIGNING YOUR HIGH SCHOOL COURSE PLAN

Career pathways are available at [http://doe.state.in.us/publications/pdf_other/pathways.pdf](http://doe.state.in.us/publications/pdf_other/pathways.pdf)
Additional information is available through the Learn More Resource Center concerning careers as well as study skills, post-secondary schools, etc. Hotline is 1-800-992-2076 or visit [www.learnmoreindiana.org](http://www.learnmoreindiana.org)

**Post High School Admissions Requirements:** In general, the Indiana Core 40 Curriculum prepares students for a wide variety of postsecondary educational options including four-year colleges, community college, apprenticeship programs, technical schools, occupational training in the military, and on-the-job training. *Students applying on-line to any school must tell their counselor, so that the counselor can send transcripts and other appropriate materials. An admission decision will be delayed until a student’s file is complete.*

**Four-Year Colleges:** The National Association of College Admissions Counselors (NACAC) recommends that students take the following courses as a preparation for four-year colleges: four years of English, four years of math, 3-4 years of laboratory science, 3-4 years of social studies, 2-3 years of foreign language, computer science, and visual and performing arts. Indiana students who are preparing for a four-year college take the Indiana Core 40 Curriculum. For some colleges, courses beyond the Core 40 curriculum are required for admissions. Students should review the admissions requirements for each college they are considering.

**Two-Year Colleges:** Ivy Tech Community College and Vincennes University offer many vocational and transfer programs. Students can complete the first two years of college at a campus near their home. Credits earned may be transferred to four-year colleges and applied toward a bachelor degree. Both have open admissions. However, to be successful and to not be required to take remedial courses, high school students are encouraged to take the Indiana Core 40 Curriculum.

**Apprenticeship Programs:** Apprenticeship programs are registered with the Indiana Bureau of Apprenticeship Training. Many of these apprenticeship programs have entry tests that prospective students must take prior to admissions. To prepare for these tests, students are encouraged to take a curriculum strong in math and communications. Students are encouraged to take the Indiana Core 40 Curriculum as a preparation for apprenticeship programs.

**Postsecondary Vocational Programs:** Many postsecondary institutions specializing in vocational / technical education exist in Indiana. These schools award certificates and/or associate degrees. Admission at these institutions is usually open to all students. However, to be successful at Indiana’s vocational / technical schools, it is recommended that students take the Indiana Core 40 Curriculum.

**Occupational Skill Training in the Military:** Students may continue their education through one of many occupational skill training opportunities in the military. Skills learned in the military can transfer to approximately 150 different civilian careers. Students interested in the military must take the ASVAB exam for admissions. To be successful in the various occupational skill training opportunities in the military, it is recommended that students take the Indiana Core 40 Curriculum.

**On-The-Job Training:** On-the-job training is provided by employers who pay their employees to participate in the training. To be successful, it is recommended that students take the Indiana Core 40 Curriculum.

**College Admissions Tests (SAT and ACT)**
Two organizations provide testing for college admissions. College Board publishes the SAT while ACT, Inc. publishes the ACT. Students are encouraged to begin college admissions testing in the spring of their junior year. Many students will take the test more than once to increase their chances of doing well. Most colleges will take the best test scores received by a student so taking the test more than once does not penalize a student in any way. In addition to college admissions, the results of these tests may also be used to award merit-based scholarships.

**Vincennes University and Ivy Tech Admissions Testing**
Vincennes University offers an admissions test in addition to the SAT or ACT for VU applicants to take at VU or in the PCHS Guidance Office with special arrangements. Ivy Tech admissions testing may be scheduled at Ivy Tech in Princeton.
Practice College Admissions Tests (PSAT and PLAN)

College Board and ACT, Inc. both offer practice tests for students. College Board’s PSAT test is given in the fall of the sophomore year at PCHS. The results of this test are also used to determine a student’s eligibility for the National Merit Scholarship Program. ACT’s practice test, is the PLAN, which includes a career interest inventory, and is given upon administration and the guidance counselors’ discretion.

Armed Services Vocational Aptitude Battery (ASVAB)

The ASVAB is a test that is available to sophomores, juniors, and seniors. It is a test that measures a student’s readiness to become proficient in a certain type of work (aptitude). Through the ASVAB test, students qualify for various training opportunities in the military, many of which have related occupations in civilian life. The ASVAB also includes a career interest inventory and is administered at PCHS in February. There is no military commitment if the test is taken.

Apprenticeship Training Admissions Tests

Many apprenticeship programs give students tests to determine their ability to succeed as an apprentice and/or their need for remediation. For example, the carpenter’s apprenticeship test includes math required to perform calculations needed on the job. Many apprenticeship programs will provide students with practice assessments upon request.

NCAA Athletic Eligibility

Many college athletic programs are regulated by the National Collegiate Athlete Association (NCAA), an organization that establishes rules on eligibility, recruiting, and financial aid for athletes. Students planning to enroll in college and participate in Division I or Division II athletics must be certified by the NCAA Initial-Eligibility Center. Students should visit www.eligibilitycenter.org to start the certification process during their junior year. A list of approved courses at PCHS is posted on this website and detailed requirements are listed in the Miscellaneous section of this guide. See NCAA Eligibility requirements at the end of the Academic Guide.

SCHOLARSHIPS

Scholarship listings are posted daily on the scrolling building announcements. In addition, the Guidance Counseling Department keeps a calendar posted outside the Guidance Counseling office. Announcements are also posted on the Guidance Counseling website ngsc.schoolfusion.us. Guidance counselors meet with the senior class periodically to answer questions and share information. Parents and students are ultimately responsible for obtaining applications from the Guidance Counseling Office and completing them on time. Some scholarship applications are also available online. Most colleges have on-line applications for admission and scholarships.

When any application is completed online, students should inform their guidance counselor.
COURSE DESCRIPTIONS

Agriculture

5056  INTRODUCTION TO AGRICULTURE, FOOD AND NATURAL RESOURCE
Introduction to Agriculture, Food and Natural Resources is a two semester course that is highly recommended as a prerequisite to and a foundation for all other agricultural classes. The nature of this course is to provide students with an introduction to the fundamentals of agricultural science and business. Topics to be covered include: animal science, plant and soil science, food science, horticultural science, agricultural business management, landscape management, natural resources, agriculture power, structure and technology, leadership development, supervised agricultural experience and career opportunities in the area of agriculture food and natural resources.
Recommended Grade Level: Grade 9
Recommended Prerequisites: None
Credits: 1 credit per semester, maximum of 2 semesters, maximum of 2 credits
Counts as a Directed Elective or Elective for the General, Core 40, Core 40 with Academic Honors and Core 40 with Technical Honors diplomas

5180  NATURAL RESOURCES
Natural Resources is a two semester course that provides students with a foundation in natural resources. Hands-on learning activities in addition to leadership development, supervised agricultural experience and career exploration encourage students to investigate areas of environmental concern. Students are introduced to the following areas of natural resources: soils, the water cycle, air quality, outdoor recreation, forestry, rangelands, wetlands, animal wildlife and safety.
Recommended Grade Level: Grade 10-12
Recommended Prerequisites: Introduction to Agriculture, Food and Natural Resources
Credits: 1 credit per semester, maximum of 2 semesters, maximum of 2 credits
Counts as a Directed Elective or Elective for the General, Core 40, Core 40 with Academic Honors and Core 40 with Technical Honors diplomas
This course is aligned with postsecondary courses for Dual Credit

5170  PLANT AND SOIL SCIENCE
Plant and Soil Science is a two semester course that provides students with opportunities to participate in a variety of activities which includes laboratory work. The following topics are found in this course: plant taxonomy, components and their functions; plant growth, reproduction and propagation; photosynthesis and respiration; environmental factors effecting plant growth, management of plant diseases and pests; biotechnology; the basic components and types of soil; calculation of fertilizer application rates and procedures for application; soil tillage and conservation; irrigation and drainage; land measurement, cropping systems, precision agriculture, principles and benefits of global positioning systems; and harvesting. Supervised agricultural experience and career exploration opportunities in the field of plant and soil science are also included.
Recommended Grade Level: Grade 11-12
Recommended Prerequisites: Introduction to Agriculture, Food and Natural Resources
Credits: 1 credit per semester, maximum of 2 semesters, maximum of 2 credits
Fulfills a Life Science or Physical Science requirement for the General Diploma only or counts as a Directed Elective or Elective for the General, Core 40, Core 40 with Academic Honors and Core 40 with Technical Honors diplomas

5088  AGRICULTURE POWER, STRUCTURE AND TECHNOLOGY  (Previously Ag. Mech.)
Indiana Department of Education 33 June 14, 2013
State Approved Course Titles & Descriptions High School Agriculture Power, Structure and Technology is a two semester, lab intensive course in which students develop an understanding of basic principles of selection, operation, maintenance and management of agricultural equipment in concert while incorporating technology. Topics covered include: safety, electricity, plumbing, concrete, carpentry, metal technology, engines, emerging technologies, leadership development, supervised agricultural experience and career opportunities in the area of agriculture power, structure and technology.
Recommended Grade Level: Grade 10-12
Recommended Prerequisites: Introduction to Agriculture, Food and Natural Resources
Dual Credit option IVY Tech AGRI 106
Credits: 1-3 credit(s) per semester, maximum of 4 semesters, maximum of 6 credits
Counts as a Directed Elective or Elective for the General, Core 40, Core 40 with Academic Honors and Core 40 with Technical Honors diplomas

5088 AGRICULTURE POWER, STRUCTURE AND TECH WITH WELDING
This course is a continuation of Ag. Pwr., Structure and Technology, although it is not a requirement for this course. Credits: 1 credit per semester. This course is a pre-requisite to Welding Technology I

5102 FOOD IMPORTANCE AND CAREERS
Food Science is a two semester course that provides students with an overview of food science and its importance. Introduction to principles of food processing, food chemistry and physics, nutrition, food microbiology, preservation, packaging and labeling, food commodities, food regulations, issues and careers in the food science industry help students understand the role that food science plays in securing a safe, nutritious and adequate food supply. A project-based approach is utilized along with laboratory, team building and problem solving activities to enhance student learning, leadership development, supervised agricultural experience and career opportunities in the area of food science. Recommended Grade Level: Grade 10-12 Recommended Prerequisites: Introduction to Agriculture, Food and Natural Resources Credits: 1 credit per semester, maximum of 2 semesters, maximum of 2 credits Fulfills a Life Science or Physical Science requirement for the General Diploma only or counts as a Directed Elective or Elective for the General, Core 40, Core 40 with Academic Honors and Core 40 with Technical Honors diplomas

5008 ANIMAL CARE
Animal Science is a two semester program that provides students with an overview of the field of animal science. Students participate in a large variety of activities and laboratory work including real and simulated animal science experiences and projects. All areas that the students study can be applied to both large and small animals. Topics to be addressed include: anatomy and physiology, genetics, reproduction, nutrition, common diseases and parasites, social and political issues related to the industry and management practices for the care and maintenance of animals while incorporating leadership development, supervised agricultural experience and learning about career opportunities in the area of animal science. Recommended Grade Level: Grade 10-12 Recommended Prerequisites: Introduction to Agriculture, Food and Natural Resources Dual Credit option IVY TECH AGRI 103 Credits: 1-3 credit(s) per semester, maximum of 2 semesters, maximum of 6 credits Fulfills a Life Science or Physical Science requirement for the General Diploma only or counts as a Directed Elective or Elective for the General, Core 40, Core 40 with Academic Honors and Core 40 with Technical Honors diplomas

5776 WELDING TECHNOLOGY I
Welding Technology I includes classroom and laboratory experiences that develop a variety of skills in oxy-fuel cutting and Shielded Metal Arc welding. This course is designed for individuals who intend to make a career as a Welder, Technician, Sales, Designer, Researcher or Engineer. Emphasis is placed on safety at all times. OSHA standards and guide lines endorsed by the American Welding Society (AWS) are used. Instructional activities emphasize properties of metals, safety issues, blueprint reading, electrical principles, welding symbols, and mechanical drawing through projects and exercises that teach students how to weld and be prepared for college and career success. Dual Credit option IVY TECH 1st semester INDT 114, 2nd semester WELD 108 Recommended Grade Level: Grade 11-12 Recommended Prerequisites: None Credits: 2-3 credits per semester, 2 semesters maximum, maximum of 6 credits. Counts as a Directed Elective or Elective for the General, Core 40, Core 40 with Academic Honors and Core 40 with Technical Honors diplomas

5778 WELDING TECHNOLOGY II
Welding Technology II builds on the Gas Metal Arc welding, Flux Cored Arc Welding, Gas Tungsten Arc welding, Plasma Cutting and Carbon Arc skills covered in Welding Technology I. Emphasis is placed on safety at all times. OSHA standards and guidelines endorsed by the American Welding Society (AWS) are used. Instructional activities emphasize properties of metals, safety issues, blueprint reading, electrical principles, welding symbols, and mechanical drawing through projects and exercises that teach students how to weld and be prepared for college and career success. Recommended Grade Level: Offered only to seniors who have completed Weld Tech I Recommended Prerequisites: Welding Technology I Credits: 2-3 credits per semester, 2 semesters maximum, maximum of 6 credits
Counts as a Directed Elective or Elective for the General, Core 40, Core 40 with Academic Honors and Core 40 with Technical Honors diplomas
This course is aligned with postsecondary courses for Dual Credit

5002 AGRIBUSINESS MANAGEMENT
Agribusiness Management provides foundational concepts in agricultural business. It is a two semester course that introduces students to the principles of business organization and management from a local and global perspective while incorporating technology. Concepts covered in the course include food and fiber, forms of business, finance, marketing, management, sales, leadership development, supervised agricultural experience, career opportunities in the area of agribusiness management.
Recommended Grade Level: Grade 11-12
Recommended Prerequisites: Introduction to Agriculture, Food and Natural Resources
Credits: 1 credit per semester, maximum of 2 semesters, maximum of 2 credits
Counts as a Directed Elective or Elective for the General, Core 40, Core 40 with Academic Honors and Core 40 with Technical Honors diplomas
Dual Credit option VU AGBS 101
Qualifies as a Quantitative Reasoning course for the General diploma only

Art

4000 INTRO 2D & 3D ART
This class is open to students in grades 9-12 who have a genuine interest in art. Students are introduced to a variety of two-dimensional media (drawing, painting, printmaking) and three-dimensional media (ceramics, sculpture, wood, and wire) and work to solve problems aesthetically.
Grade level: 9-12

4004 ADVANCED 2D & 3D ART
The second year in art is designed to allow students in grades 10-12 to further develop their artistic skills. These classes generally do fewer projects, with more emphasis on improving the students’ technical skills and creative problem solving abilities. Approval of instructor is required.
Grade Level: 10-12 Prerequisite: Intro 2D and 3D Art & Instructor Approval

4040 DRAWING & CERAMICS
The third year art course is designed for students who have successfully completed the first two years of art and wish to concentrate more intensely in the areas of drawing and ceramics. Approval of instructor is required.
Grade Level: 11-12 Prerequisite: Intro 2D and 3D Art; Advanced 2D and 3D Art & Instructor Approval

4044 PAINTING & SCULPTURE
The fourth year art classes are designed for exceptional students who plan a career in art. Approval of the instructor is required.
Grade Level: 12 Prerequisite: All previous art classes (3 years) & Instructor Approval

Business Education

5394 PREPARING FOR COLLEGE AND CAREERS
Addresses the knowledge, skills, and behaviors all students need to be prepared for success in college, career, and life. The focus of the course is the impact of today’s choices on tomorrow’s possibilities. Topics to be addressed include twenty-first century life and career skills; higher order thinking, communication, leadership, and management processes; exploration of personal aptitudes, interests, values, and goals; examining multiple life roles and responsibilities as individuals and family members; planning and building employability skills; transferring school skills to life and work; and managing personal resources. This course includes reviewing the 16 national career clusters and Indiana's College and Career Pathways, in-depth investigation of one or more pathways, reviewing graduation plans, developing career plans, and developing personal and career portfolios. A project-based approach, including computer and technology applications, cooperative ventures between school and community, simulations, and real life experiences, is recommended.
Grade Level: 9 Required

4518 INTRODUCTION TO BUSINESS
A one-semester course taught opposite semester with Preparing for College and Careers.
Introduces students to the world of business, including the concepts, functions, and skills required for meeting the challenges of operating a business in the twenty-first century on a local, national, and/or international scale. The course covers business management, entrepreneurship, marketing fundamentals, and business ethics and law. The course further develops business vocabulary and provides an overview of business and the role that business plays in economic, social, and political environments.

Grade Level: 9 Required

4516 COMPUTER ILLUSTRATION AND GRAPHICS
Computer Illustration and Graphics introduces students to the computer's use in visual communication. The focus of the course is on basic computer terminology and use, mastering fundamental skills, and developing efficient working styles. These skills are then developed by creating work using imaging, drawing, interactive, and page layout software. The course includes organized learning experiences that incorporate a variety of visual art techniques as they relate to the design and execution of layouts and illustrations for advertising, displays, promotional materials, and instructional manuals. This course also covers advertising theory and preparation of copy, lettering, posters, vector illustrations, graphics, and logos, and artwork in addition to incorporation of photographic images. Communication skills will be emphasized through the study of effective methods used to design products that impart information and ideas. Advanced instruction might include experiences in silk screening and airbrush techniques as well as activities in designing product packaging and commercial displays or exhibits.

Grade Level: 11-12

Pre-Reqs: Digital Apps and Responsibility

Credits: 2 semester course, 2 semesters required, 1-3 credits per semester, 6 credit max

4528 DIGITAL APPLICATIONS AND RESPONSIBILITY
Digital Applications and Responsibility prepares students to use technology in an effective and appropriate manner in school, in a job, or everyday life. Students develop skills related to word processing, spreadsheets, presentations, and communications software. Students learn what it means to be a good digital citizen and how to use technology, including social media, responsibly. Students expand their knowledge of how to use digital devices and software to build decision-making and problem-solving skills. Students should be provided with the opportunity to seek industry-recognized digital literacy certifications.

Grade Level: 9-12

Credits: 1 to 2 semester course, 1 credit per semester, 2 credits maximum

4524 INTRODUCTION TO ACCOUNTING
Accounting I is a business course that introduces the language of business using Generally Accepted Accounting Principles (GAAP) and procedures for proprietorships and partnerships using double-entry accounting. Emphasis is placed on accounting principles as they relate to both manual and automated financial systems. This course involves understanding, analyzing, and recording business transactions and preparing, analyzing, and interpreting financial reports as a basis for decision making. Instructional strategies will include the use of computers, projects, simulations, case studies, and business experiences requiring the application of accounting theories and principles.

Grade Level: 10-12

Prerequisites: Digital Citizenship

4522 ADVANCED ACCOUNTING
Accounting II is an advanced-level business course that builds upon the Generally Accepted Accounting Principles (GAAP) and procedures learned in Accounting I. Emphasis is placed on managerial decisions made in corporate accounting, including in-depth analysis of financial statements. The importance of making ethical business decisions is emphasized. Instructional strategies will include the use of spreadsheets, word processing, and accounting software. Projects, simulations, case studies, and business experiences are used to apply accounting principles and produce appropriate financial reports.

Grade Level: 11-12

Prerequisites: Accounting I and Digital Citizenship

Recommended Prerequisite: Algebra II

4560 BUSINESS LAW AND ETHICS
Business Law and Ethics provides an overview of the legal system in the business setting. Topics covered include: basics of the judicial system, contract, personal, employment and property law. Application of legal principles and ethical decision-making techniques are presented through problem-solving methods, case review, and situational analyses.

Grade Level: 11, 12

Credits: 2 semester course, 2 semesters required, 1 credit per semester, 2 credits max

4801 COMPUTER SCIENCE I
Computer Science I introduces the structured techniques necessary for the efficient solution of business-related computer programming logic problems and coding solutions into a high-level language. The fundamental concepts of programming are provided through explanations and effects of commands and hands-on utilization of lab equipment to produce accurate outputs. Topics include program flowcharting, pseudo coding, and hierarchy charts as a means of solving problems. The course covers creating file layouts, print charts, program narratives, user documentation, and system flowcharts for business problems; algorithm development and review, flowcharting,
input/output techniques, looping, modules, selection structures, file handling, control breaks, and offers students an opportunity to apply skills in a laboratory environment.
Grade Level: 10-12 Credits: 2 semester course, 2 semesters required, 1-3 credit per semester, 6 credits max

5230 INFORMATION TECHNOLOGY SUPPORT I
Information Technology Support (formerly computer tech support) allows students to explore how computers work. Students learn the functionality of hardware and software components as well as suggested best practices in maintenance and safety issues. Through hands-on activities and labs, students learn how to assemble and configure a computer, install operating systems and software, and troubleshoot hardware and software problems.
Grade Level: 10, 11 Pre-Req: Digital Apps and Responsibility
Credits: 2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum

5914 PRINCIPLES OF MARKETING
Principles of Marketing provides a basic introduction to the scope and importance of marketing in the global economy. Emphasis is placed on oral and written communications, mathematical applications, problem-solving, and critical thinking skills as they relate to advertising/promotion/selling, distribution, financing, marketing-information management, pricing, and product/service management.
Grade Level: 11-12 Credits: 2 semester course, 2 semesters required, 1 credit per semester, 2 credits max

5974 WORK BASED LEARNING, MULTIPLE PATHWAYS
Work Based Learning is an instructional strategy that prepares students for college and career; builds students’ skills and knowledge in their chosen career path or furthers their study within the area of interest. A standards based training plan is developed by the student, teacher, and workplace mentor to guide the student’s work based learning experiences and assist in evaluating achievement and performance, whether WBL is a stand-alone course or a component of a discipline-specific CTE course. In the stand-alone WBL courses, students have the opportunity to apply the concepts, skills, and dispositions learned in previous coursework in their pathways in real world business and industry settings. Therefore, at least two courses in a student’s pathway would be prerequisite to the student enrolling in the stand-alone WBL courses.
Students are monitored in their experiences by the teacher and employer.
Required Prerequisites: Preparing for College and Careers; 4 credits of introductory and advanced courses related to a student’s pathway
Credits: 2-3 credits per semester, maximum of 6 credits
Grade: 12 or administration approval
Additional application required.

5984 SPORTS AND ENTERTAINMENT MARKETING
Sports and Entertainment Marketing is a specialized marketing course that develops student understanding of the sport/event industries, their economic impact, and products; distribution systems and strategies; pricing considerations; product/service management, and promotion. Students acquire an understanding and appreciation for planning. Throughout the course, students are presented problem-solving situations for which they must apply academic and critical-thinking skills. Participation in cooperative education is an optional instructional method, giving students the opportunity to apply newly acquired marketing skills in the workplace.
Grade Level: 11, 12 Pre-Req: Principles of Marketing
Credits: 2 semester course, 2 semesters required, 1 credit per semester, 2 credit max

**Engineering and Trade Technology**

4784 INTRODUCTION TO MANUFACTURING
Introduction to Manufacturing is a course that specializes in how people use modern manufacturing systems with an introduction to manufacturing technology and its relationship to society, individuals, and the environment. An understanding of manufacturing provides a background toward developing engineering and technological literacy. This understanding is developed through the study of the two major technologies, material processing and management technology, used by all manufacturing enterprises. Students will apply the skills and knowledge of using modern manufacturing processes to obtain resources and change them into industrial materials, industrial products and consumer products. Students will investigate the properties of engineered materials, such as: Metallics; polymers; ceramics; and composites. After gaining a working knowledge of these materials, students will study six major types of material processes: Casting and molding; forming; separating; conditioning; finishing; and assembling.
Grade Level: 9-12 First semester/1 semester only
Principles of Engineering is a course that focuses on the process of applying engineering, technological, scientific and mathematical principles in the design, production, and operation of products, structures, and systems. This is a hands-on course designed to provide students interested in engineering careers to explore experiences related to specialized fields such as civil, mechanical, and materials engineering. Students will engage in research, development, planning, design, production, and project management to simulate a career in engineering. The topics of ethics and the impacts of engineering decisions are also addressed. Classroom activities are organized to allow students to work in teams and use modern technological processes, computers, CAD software, and production systems in developing and presenting solutions to engineering problems.

**Recommended Grade Level:** 9

**Recommended Prerequisites:** none

**Credits:** 2 semester course, 2 semesters required, 1 credit per semester, 2 credits maximum

**Counts as:** A Directed Elective or Elective for all diplomas
4836 MECHANICAL DRAFTING AND DESIGN I
Mechanical Drafting and Design I provides students with a basic understanding of the detailing skills commonly used by drafting technicians. Areas of study include: lettering, sketching, proper use of equipment, geometric constructions with emphasis on orthographic (multi-view) drawings that are dimensioned and noted to ANSI standards. Another purpose of this course is to provide students with a basic understanding of the features and considerations associated with the operation of a computer-aided design (CAD) system. Students will gain valuable hands-on experience with Auto CAD. They will be expected to complete several projects (increasing in difficulty) relating to command topics. Topics include: 2D drawing commands, coordinate systems, editing commands, paper and model space, inquiry commands, layers, plotting, text, and basic dimensioning.
Grade Level: 10-12

4838 MECHANICAL DRAFTING AND DESIGN II
Mechanical Drafting and Design II covers working drawings both in detailing and assembly. Topics include: Fastening devices, thread symbols and nomenclature, surface texture symbols, classes of fits, and the use of parts lists, title blocks and revision blocks. This course will also focus on advanced CAD features, including fundamentals of three-dimensional modeling for design. An overview of modeling, graphical manipulation, part structuring, coordinate system, and developing strategies of modeling will also be included. Advanced CAD will enable the student to make the transition from 2D drafting to 3D modeling. Students will draw and calculate three-dimensional problems. Theory and methods include graphic developments and the relationships between points, lines and planes, curved lines and surfaces, intersections, and development. Computer software and hardware experiences, as they relate to drafting and design, will be covered.
Grade Level: 10-12

5608 ADVANCED MANUFACTURING I
Advanced Manufacturing I is a course that includes classroom and laboratory experiences in two broad areas: Industrial Technology/Software Controls and Manufacturing Trends. Industrial Technology and Software Controls covers wiring and schematic diagrams used to design, install, and repair electrical/electronic equipment such as wireless communication devices, programmable controllers. Course content will include basic theories of electricity, electronics, digital technology, and basic circuit analysis. Activities include experiences in: Soldering; use of an oscilloscope, meters, signal generators and tracers; bread-boarding; circuit simulation software; and troubleshooting. Understanding and using the underlying scientific principles related to electricity, electronics, circuits, sine waves, and Ohm’s Law are integral to this course. Manufacturing Trends covers basic concepts in manufacturing operations and plant floor layout in the production environment. Applications of Computer Numerical Control (CNC), and lathe and turning operations are developed as a foundation for machining operations. Coordinate system concepts are introduced as relevant to machining processes, as well as fluid and mechanical power, welding, and lean manufacturing. Fluid power concepts will include hydraulic components and circuits, laws and principles, fluid power controllers, and the construction of systems. In the mechanical power portion of the course, students will learn about machine specifications, basic forces, friction, simple machines, motors, and motor controls. Students will also be introduced to lean manufacturing where they will study concepts including: Lean goals, product quality, eliminating waste, cost effectiveness, lean concepts, resource planning, continuous improvement, and the various advantages of lean manufacturing. This course includes MSSC concepts required to earn MSSC certification.
Grade Level: 10-12

5606 ADVANCED MANUFACTURING II
Advanced Manufacturing II introduces basic blueprint reading, Computer Numerical Control (CNC) operation and the skills commonly used in the manufacturing industry. Areas of study include: interpretation of drawing dimensions and notes to ANSI standards for machining including: Geometric Dimensioning and Tolerancing (GDT), welding, fabrication applications and inspection techniques. Students will be able to use Computer Aided Design software (CAD) to create 3D models and working drawings. Skills in the setup and operation of a CNC mill and lathe will also be acquired using multiple machine tool controllers. Other more general topics will include coordinate systems, dimensioning, line precedence, multi-view drawings, safe dress, tool paths, speed and feed calculations, and tool selection. The course also introduces robotics, automation, and Computer Integrated Manufacturing Technology (CIMT). Common types of factory automation will be identified. The course will focus on three main types of manufacturing automation including: Programmable Logic Controllers (PLC), Computer Numerically Controlled Machines (CNC), and Robotics. Topics cover robotic principles including basic theory, robot safety, robotic classifications, applications, socioeconomic impact, work cell design, robot programming (Pendant and Software Language), and sensor and actuator interfacing. Students will be required to design, program and troubleshoot computer controlled machine logic and production processes in a project oriented learning environment.
5686  INDUSTRIAL TECHNICAL MAINTENANCE I
Industrial Technical Maintenance I includes classroom and practical experiences that prepare students to apply technical knowledge and skills to repair and maintain industrial machinery and equipment. Instructional activities develop diagnostic and problem-solving skills related to electric circuits, wiring, motors, robotics, hydraulics, and pneumatics. Additional areas of instruction should include plumbing, rigging, basic machining, welding, and cutting. ● Recommended Grade Levels: 11, 12 ● Recommended Prerequisites: Introduction to Manufacturing ● 2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum ● Counts as a Directed Elective or Elective for all diplomas

4782  CONSTRUCTION SYSTEMS
Construction Systems is a course that specializes in how people use modern construction systems and the management of resources to efficiently produce a structure on a site. Students will explore the application of tools, materials, and energy in designing, producing, using, and assessing the construction of structures. Classroom activities introduce students to the techniques used in applying construction technology to the production of residential, commercial, and industrial buildings in addition to civil structures. Students learn how architectural ideas are converted into projects and how projects are managed during a construction project in this course. Grade Level: 10-12  First semester/1 semester only

4834  DESIGN FUNDAMENTALS
Design Fundamentals introduces students to fundamental design theory. Investigations into design theory and color dynamics will provide experiences in applying design theory, ideas and creative problem solving in the areas of communication technology. Student learning experiences encompass art history, art criticism, aesthetics, and production which lead to the creation of portfolio quality works. Students reflect upon and refine their work; explore cultural and historical connections; analyze, interpret, theorize, and make informed judgments about artwork and the nature of art in areas of communication; relate art to other disciplines and discover opportunities for integration; and incorporate literacy and presentational skills. Grade Level: 10-12  Second semester/1 semester only

English/Language Arts

1002  ENGLISH 9
Through the integrated study of literature, composition, and grammar, English 9 students further develop their use of language as a tool for learning and thinking. Students practice identifying, analyzing, and composing different genres of written language. The survey of literature includes short stories, poetry, nonfiction, novels, technical documents, and independent reading. Using technology and process writing, students focus on multi-paragraph writings, culminating in a MLA research paper. Oral communication emphasizes small group and large group presentations, and grammar is taught as needed to enhance writing. Independent and group projects give students further opportunities to demonstrate comprehension, creativity, and analytical thought. Grade Level: 9

1002H  ENGLISH 9 HONORS
Through the integrated study of literature, composition, and grammar, English 9 students further develop their use of language as a tool for learning and thinking. Students practice identifying, analyzing, and composing different genres of written language. The survey of literature includes short stories, poetry, nonfiction, novels, technical documents, and independent reading. Using technology and process writing, students focus on multi-paragraph writings, culminating in a MLA research paper. Oral communication emphasizes small group and large group presentations, and grammar is taught as needed to enhance writing. Independent and group projects give students further opportunities to demonstrate comprehension, creativity, and analytical thought. Depth and breadth of English 9 material is adjusted at the discretion of the teacher to meet the needs of advanced learners. For the above average eighth grade English student. Grade Level: 9 (PCMS teacher recommendation)  * This course is weighted/using 4.5 grading scale.

E1004  ENGLISH 10
This is an integrated literature, grammar, and composition course focusing on the theme of the human condition. The multiple genre approach encourages students to think critically and reflectively about the relationship between the individual and society. Students use technology to practice the writing process and to improve communication skills. Peer editing, cooperative learning, and individual and group projects will be utilized to enhance skill development. Grade Level: 10
1004H  ENGLISH 10 HONORS
This is an integrated literature, grammar, and composition course focusing on the theme of the human condition. The multiple genre approach encourages students to think critically and reflectively about the relationship between the individual and society. Students use technology to practice the writing process and to improve communication skills. Peer editing, cooperative learning, and individual and group projects will be utilized to enhance skill development. Depth and breadth of English 10 material is adjusted at the discretion of the teacher to meet the needs of advanced learners. For the above average ninth grade English student.
Grade Level: 10 (Prerequisite: English 9 Honors or English teacher recommendation)
* This course is weighted/using 4.5 grading scale.

1006  ENGLISH 11
Language arts instruction involves an integrated approach to the study of American Literature and composition. Students will respond critically, reflectively, and imaginatively to American literature, including major authors from the Puritan Era, Age of Reason, Romantic Period, Civil War Era, the Twenties and Thirties, and the Modern period. These works will also be placed in historical context and linked to modern novels or films. Students will also employ the basic modes of oral and written expression through the development effective narrative and descriptive procedures, including focus and logical organization of ideas. Using technology, students learn the basics of research, prewriting, drafting, revising, and editing. Students are encouraged to use the MLA style manual. Students will study technical reading and writing in a life-skills format. The formal study of grammar, usage, spelling and language mechanics is integrated into the study of writing. SAT/ACT preparation will be introduced.
Grade Level: 11

1006H  ENGLISH 11 HONORS
Language arts instruction involves an integrated approach to the study of American literature and composition. Students will respond critically, reflectively, and imaginatively to American literature, including major authors from the Puritan Era, Age of Reason, Romantic Period, Civil War Era, the Twenties and Thirties, and Modern Drama. These works will be placed in historical context and linked thematically to modern or classic novels and films. Oral communication and research skills will be developed through study of American civics. Students will employ the basic modes of oral and written expression through the development of effective narrative, descriptive, and analytic procedures, including focus and logical organization of ideas. Students will be introduced to college level analytical writing, including in-depth literature analyses and research. Students will use one or more of the manuals of style, such as MLA, APA, or CMS. The formal study of grammar usage, spelling, and language mechanics is integrated into the study of writing. SAT/ACT preparation will be introduced. For the above average tenth grade English Honors student who has passed the ECA. Recommended for an Academic Honors Diploma.
Grade Level: 11

1008  ENGLISH 12
English 12 is a study of language, literature, composition, and oral communication focusing on an exploration of point of view or perspective across a wide variety of genres. Students use literary interpretation, analysis, comparisons, and evaluation to read and respond to representative works of historical or cultural significance for Grade 12 in classic and contemporary literature balanced with nonfiction. Students write fictional narratives, short stories, responses to literature, reflective compositions, historical investigation reports, resumes and technical documents incorporating visual information in the form of pictures, graphs, and tables. Students write and deliver grade-appropriate multimedia presentations and access, analyze, and evaluate online information.
Grade Level: 12

1124  ADV. ENGLISH LANGUAGE ARTS/LIT SURVEY
English/Language Arts, College Credit, is an advanced course based on Indiana's Academic Standards for English/Language Arts and the Common Core State Standards for English/Language Arts in Grades 11 and 12. This course title covers any English language and composition advanced course offered for credit by an accredited postsecondary institution through an adjunct agreement with a secondary school. Recommended for an Academic Honors Diploma.
Dual Credit Option USI Eng 101 1st semester, Eng 105 2nd semester
Grade Level: 12

1056/1058  AP LITERATURE AND COMPOSITION
English Literature and Composition, Advanced Placement, is an advanced placement course based on content established by the College Board. An AP English course in Literature and Composition engages students in the careful reading and critical analysis of imaginative literature. Through the close reading of selected texts, students deepen their understanding of the ways writers use language to provide both meaning and pleasure for their readers. As they read,
students consider a work's structure, style, and themes as well as such smaller scale elements as the use of figurative language, imagery, symbolism, and tone. The course includes intensive study of representative works from various genres and periods, concentrating on works of recognized literary merit. Students will take the AP Literature and Composition exam in May. Recommended for an Academic Honors Diploma.

1058 Semester 1 ENG 105, 1056 ENG 101 (score 3 or above on AP exam)
Grade Level: 12

1076 SPEECH
Speech is a one-semester class intended to provide the student with the skills necessary for and practice in the basic principles of effective oral communication. Through the study of verbal and nonverbal communication students will gain insight into the communication process and themselves. Students will participate in a variety of group activities designed to promote teamwork and group communication skills. In addition, students will plan and deliver a range of solo and group presentations designed to mimic situations students may encounter outside of the school setting. This course includes some research and uses of technology. PCHS requirement for graduation beginning with Class of 2008.
Grade Level: 10-12

1010 LANGUAGE ARTS LAB/APEX
Language Arts Lab is a supplemental course that provides students with individualized or small group instruction designed to support success in completing language arts course work aligned with Indiana's Academic Standards for English Language Arts in Grades 9-12 and the Common Core State Standards for English Language Arts. The course may also be used for students who need extra preparation for standardized examinations (i.e. English ECA for juniors and seniors). This lab may also be used for recovery of social study courses with counselor approval.
Grade Level: 10-12

**English/Language Arts Electives**

0532 COLLEGE ENTRANCE EXAM PREP (SAT/ACT PREP) (Semester 1)
This course is recommended to anyone going beyond a high school education or anyone taking the SAT or ACT test. Concentration is on critical reading strategies, grammar, editing, and vocabulary to enhance preparation for taking the standardized tests.
Grade Level: 11-12

1060 ETYMOLOGY (Semester 2)
Etymology, a language studies course based on the Indiana Academic Standards for English/Language Arts, is the study and application of the derivation of English words and word families from their roots in ancient and modern languages (Latin, Greek, Germanic, and Romance Languages). Students analyze meanings of English words by examining roots, prefixes, and suffixes. Students analyze the connotative and denotative meaning of words in a variety of contexts and the reasons for language change. Students write about word history and semantics in texts that require etymological sensitivity, such as Renaissance poetry or works in translation.
Grade Level: 11-12

1078 ADVANCED SPEECH AND COMMUNICATION (offered opposite of Novels)
The study and application of skills in learning, oral interpretation, media communications, research methods, and oral debate. Students deliver different types of oral debate. Students deliver different types of oral and multi-media presentations, including but not limited to, speeches to inform, to motivate, to entertain, to persuade, through the use of impromptu, extemporaneous, memorize or manuscript delivery. Advanced Speech and Communication project: Students will complete a multi-media project that advances either our school or our community.

Dual Credit option OCU COMM 202

1042 NOVELS (offered opposite of Adv. Speech and Comm.)
The Novel course, like all courses on literacy genre, focuses on the relationship between form and meanings. In this course students are expected to read and analyze novels and short stories in the Mystery, Horror, Science Fiction, and Fantasy genres. Each genre will include a classic and a modern version of the genre. Students will be expected to read extensively and to participate in group discussions and analysis of reading. Students will explore the distinct features of the short story and the novel: setting, conflict, climax, resolution, audience, purpose, and historical context. The course will culminate in the student writing a story in the genre.
Grade Level: 11-12

1034 FILM LITERATURE/STUDIES IN FILM
Film Literature studies the diversified ideas and concept that interact when written literature is adapted to film or when a literary work is originally conceived for film presentation. This course includes the analysis of (1) the impact of film on the ways in which people perceive the human condition, (2) the ways in which the roles of men and women and various ethnic minorities are portrayed, (3) visual interpretations of literary techniques and auditory language effects, (4) a history of film as a medium of literary interpretation. Students are given opportunities to present and discuss their ideas as well as opportunities to role-play as movie directors. Students also have frequent writing assignments in which they explore and analyze issues of interpretations, production, and cross-genre adaptation.

Grade Level: 10-12  
This is a one-semester class.

1036 FILM GENRES
Film Genres, a course based on Indiana’s Academic Standards for English/Language Arts, is a study of the various genres and sub-genres of cinema. Students can learn about defining characteristics of each genre, the reflection of influence of film on culture, and the interpretation, analysis, and adaptation of films. Students examine films for the application of film terms, analyze films for themes about human condition, gender roles, and ethnic diversity; and learn the qualities of award winning films while working on independent cooperative projects. (Course includes viewing approximately 20+ films.)

Grade Level: 10-12  
This is a one-semester class.

1086N STUDENT PUBLICATION – NEWSPAPER
Students plan, write, take pictures for, design, publish, market and distribute the school newspaper. Word processing and desktop publishing and 35 mm digital cameras will be used. Students must have an English grade of a C or better. Instructor approval is required. *Publication should also be taken with this course.

Grade Level: 9-12  
**Counts as a Fine Arts Elective

1086N2 STUDENT PUBLICATION – NEWSPAPER II
Grade Level: 10-12 *Publication should also be taken with this course.

Dual Credit option USI JRN 180

1086YB STUDENT PUBLICATION – YEARBOOK
This course provides the study of and practice in photography and gathering information and writing in order to produce the school’s yearbook. This course provides further study in using the 35 mm and digital cameras. Students will also continue instruction in journalistic writing, layout and design, including typography, as well as advertising. Instructor approval is required. *Publication should also be taken with this course.

Grade Level: 9-12  
**Counts as a Fine Arts Elective

1086YB2 STUDENT PUBLICATION – YEARBOOK II
Grade Level: 10-12 *Publication should also be taken with this course.

Dual Credit option USI JRN 180

1080 JOURNALISM
Journalism is a course dedicated to preparing students to be conscious media consumers. Students will learn the basics of news and features reporting in addition to learning how to design newspaper pages and take photos. Students will study the history of news delivery system and also examine how social media and the 24/7 news cycle has forever changed news organizations.

Grade Level: 9-12  
This is a one-semester class

1084 MASS MEDIA
Mass Media, a course based on the High School Journalism Standards and the Mass Media and Media Literacy Standards, is the study of the importance of mass media as pervasive in modern life at the local, national, and global levels. It includes a study of the impact of constant and immediate news, entertainment, and persuasive messages on everyday life. Students use course content to become knowledgeable consumers of mass media in preparation for their roles as informed citizens in a democratic society. For the second credit: Students continue to critically analyze mass media products and messages as they influence societal rules. By the end of the semester, students complete a multimedia project comparing different aspects of a topic of interest or concern. The project demonstrates knowledge, application, and progress in Mass Media course content.

Grade Level: 9-12  
Credits: 1 semester course, 1 credit per semester

1084MM2 ADVANCED MASS MEDIA
This course is designed as a successive semester of instruction at the advanced level of mass media.
5364 INTERPERSONAL RELATIONSHIPS
Interpersonal Relationships is an introductory course that is especially relevant for students interested in careers that involve interacting with people. It is also valuable for all students as a life foundation and academic enrichment. This course addresses knowledge and skills needed for positive and productive relationships in career, community, and family settings. Major course topics include communication skills; leadership, teamwork, and collaboration; conflict prevention, resolution, and management; building and maintaining relationships; and individual needs and characteristics and their impacts on relationships. A project-based approach that utilizes higher order thinking, communication, leadership, and management processes, and fundamentals to college and career success is recommended in order to integrate these topics into the study of interpersonal relationships. Direct, concrete language arts proficiencies will be applied. Service learning and other authentic applications are strongly recommended. This course provides a foundation for continuing and post-secondary education for all career areas that involve interacting with people both inside and outside of a business/organization, including team members, clients, patients, customers, and the general public.
Grade Level: 10, 11
Credits: 1 semester course, 1 credit per semester, 1 credit maximum

Family and Consumer Sciences

5412 EDUCATION & EARLY CHILDHOOD CAREERS I
(Child Care) This is a one-year, two-semester course. This course requires two class periods per day, one for lecture and one for lab. It will earn a total of four credits for the year. This course allows the students to help manage and facilitate the Child Care Lab. Must have instructor approval.
Grade Level: 11-12
2 credits per semester

5406 EDUCATION & EARLY CHILDHOOD CAREERS II
This is a one-year, two-semester course. This course requires two class periods per day, one for lecture and one for lab. It will earn a total of four credits for the year. This course goes a step beyond the first year, it allows the students to help manage and facilitate the Child Care Lab. Must have instructor approval.
Grade Level: 12
Prerequisite: Education & Early Childhood Careers I
2 credits per semester

5342 NUTRITION AND WELLNESS
_Nutrition and Wellness_ is an introductory course valuable for all students as a life foundation and academic enrichment; it is especially relevant for students interested in careers related to nutrition, food, and wellness. This is a nutrition class that introduces students to only the basics of food preparation so they can become self-sufficient in accessing healthy and nutritious foods. Major course topics include nutrition principles and applications; influences on nutrition and wellness; food preparation, safety, and sanitation; and science, technology, and careers in nutrition and wellness. A project-based approach that utilizes higher order thinking, communication, leadership, management processes, and fundamentals to college and career success is recommended in order to integrate these topics into the study of nutrition, food, and wellness. Food preparation experiences are a required component. Direct, concrete mathematics and language arts proficiencies will be applied. This course is the first in a sequence of courses that provide a foundation for continuing and post-secondary education in all career areas related to nutrition, food, and wellness.
Grade Level: 9-12
THIS IS ONLY A ONE SEMESTER COURSE/ Maximum of 1 semester, 1 credit maximum

5340 ADVANCED NUTRITION AND WELLNESS
_Advanced Nutrition and Wellness_ is a course which provides an extensive study of nutrition. This course is recommended for all students wanting to improve their nutrition and learn how nutrition affects the body across the lifespan. _Advanced Nutrition and Wellness_ is an especially appropriate course for students interested in careers in the medical field, athletic training and dietetics. This course builds on the foundation established in _Nutrition and Wellness_, which is a required prerequisite. This is a project-based course; utilizing higher-order thinking, communication, leadership and management processes. Topics include extensive study of major nutrients, nutritional standards across the lifespan, influences on nutrition/food choices, technological and scientific influences, and career exploration in this field. Laboratory experiences will be utilized to develop food handling and preparation skills; attention will be given to nutrition, food safety and sanitation. This course is the second in a sequence of courses that provide a foundation for continuing and post-secondary education in all career areas related to nutrition, food, and wellness.
Grade Level: 9-12
Prerequisite: Nutrition and Wellness

5540 CULINARY ARTS AND HOSPITALITY I
Culinary Arts and Hospitality I prepares students for occupations and higher education programs of study related to the entire spectrum of careers in the hospitality industry. This course builds a foundation that prepares students to enter the Advanced Culinary Arts or Advanced Hospitality courses. Major topics include: introduction to the hospitality industry; food safety and personal hygiene; sanitation and safety; regulations, procedures, and emergencies; basic culinary skills; culinary math; and food preparation techniques and applications; principles of purchasing, storage, preparation, and service of food and food products; apply basic principles of sanitation and safety in order to maintain safe and healthy food service and hospitality environments; use and maintain related tools and equipment; and apply management principles in food service or hospitality operations. Interactive laboratory experiences with commercial applications are a required component of this course of study. Student laboratory experiences may be either school-based or "on-the-job" or a combination of the two. Work based experiences in the food industry are strongly encouraged. A standards-based plan guides the students' laboratory experiences. Students are monitored in their laboratory experiences by the Culinary Arts and Hospitality teacher. Articulation with post-secondary programs is encouraged.

Grade Level: 11, 12
Pre-Req: Nutrition and Wellness
Credits: 2 semester course, 2 semesters required, 1-3 credits per semester, 6 credits maximum

**Machine Trade Technology**

4796  INTRODUCTION TO MACHINE TOOLS 1-2
This class is designed to teach the student all parts and functions of a Lathe, Mill and Drill Press. The student will learn to use Precision Measurement Tools and techniques. The student will learn shop and machine safety rules and regulations. After a student is successful learning the above skills he or she will start using machines to make projects. This class will be completed in one semester.

**Dual Credit option VU PMTD 108**
Grade Level: 9-12  Grade 9 with Instructor Approval  2 periods, 2 credits (take only one semester)

5782T1/2  PRECISION MACHINE TECHNOLOGY I
This course is designed to provide the student with a basic understanding of the processes used to produce industrial goods. Topics to be discussed include measurement, welding, shop math and blueprint reading. Students will experience hands-on training with measurement and layout, and machine tool operation. National Tooling and Machine Association (NTMA). Machine Level I Skill Standards will be incorporated into this course.

**Dual Credit option VU PMTD 110 1st semester, PMTD 117 2nd semester**
Grade Level: 10-12  No prerequisite  2 credits per semester

5782/5784T2  PRECISION MACHINE TECHNOLOGY II
This course is designed to provide the student with a basic understanding of the processes used to produce industrial goods. Topics to be discussed include advanced measurement, lay out and inspection, machine tool processes and operations, metallurgy, welding, shop math, and blueprint reading. Students will experience hands-on training with measurement layout, and machine tool operation. National Tooling and Machining Association (NTMA). Machining Level I Skill Standards will be incorporated into this course.

**Dual Credit option VU PMTD 118 1st semester, PMTD 119 2nd semester**
Grade Level: 11-12  2 credits (2 periods) per semester  Prerequisite: Precision Machine I

5784  PRECISION MACHINE TECHNOLOGY III
Precision Machines III:  Semester 1.  Prerequisite: a grade of C or better in Precision Machining II.  This course will provide the student with extensive programing knowledge of CNC mills and lathe. Students will use Hurco Win-max software to input information, edit, set-up tooling, and graphically verify the appropriate code for HURCO VMC 30 CNC Mill. Student will then set-up and run program on HURCO VMC-30 Mill.

**Dual Credit option VU PMTD 111 1st semester, PMTD 112 2nd semester**
Grade Level: 12  2 credits (2 periods) per semester  Prerequisite: Precision Machine 2

**Mathematics**
Math Policies:
****Algebra and Geometry grades from middle school ARE applied to the student's high school transcript. ****Please also be aware, that despite the level of math attained before high school, students must earn 6-8 additional math credits during grades 9-12.

1) Students who fail the second semester of a math class are required to audit the first semester of that class before retaking the second semester. The audit must take place during the first semester of the school year in which the retake occurs.
2) Successful completion of semester 1 is necessary to continue with semester 2. Exceptions may be made with teacher approval.
3) Ninth grade students who wish to take Geometry must have an “A” or “B” in eighth grade Algebra and either have passed the Algebra ECA or have the teacher recommendation. Students who earned a “C” or “D” must retake Algebra in the ninth grade unless they pass the Algebra ECA.

2516 ALGEBRA 1 LAB (Formerly Algebra Enrichment)
The course provides students with additional time to build the foundations necessary for high school math courses, while concurrently having access to rigorous, grade-level appropriate courses. The five critical areas of Algebra Enrichment align with the critical areas of Algebra I: Relationships between quantities and reasoning with Equations; Linear and Exponential Relationships; Descriptive Statistics; Expressions and Equations; and Quadratic Functions and Modeling (Description from I-DOE).
Students gain support for the Algebra I course. When enrolled in Algebra Enrichment, the student must also be taking Algebra I, or at least during the same academic year.
Grade Level: 9

2520 ALGEBRA I
This two-term course covers basic Algebraic concepts as directed by state standards. It is recommended for the student with a previous math grade range of A to C. May be taken in conjunction with Algebra 1 Lab with instructor approval.
Grade Level: 9 Required For Graduation

2560 MATH LAB/APEX
Is a HELP class, does not meet any Math Requirement for graduation. MAY be used for individual credit recovery with Math Department approval.
Grade Level: 10-12 1 credit per semester

2532 GEOMETRY
This two-term course covers basic Geometric concepts as directed by state standards. It is recommended for the student with average or above math achievement (A to C grade range for Algebra 1.)
Grade Level: 9-12 Prerequisite: Algebra I

2532 GEOMETRY HONORS
Algebra teacher recommendation. Prerequisite: Algebra 1 in middle school or teacher approval.

2522 ALGEBRA II
This two-term course covers advanced Algebraic concepts as directed by state standards. It is recommended for the student with a grade range of A to C+ in Geometry. With department approval this course can be taken simultaneously with Geometry.
Grade Level: 10-12 Prerequisite: Algebra I

2522H ALGEBRA II HONORS
This course is for recommended students only. Students who complete Geometry in middle school with a letter grade of an “A,” are recommended in addition to students referred by PCHS Geometry teachers. This course is faster paced than Algebra II.
Grade Level: 9-10  *This course is weighted/using 4.5 grading scale.

2524 ANALYTICAL ALGEBRA II
Analytical Algebra II builds on previous work with linear, quadratic and exponential functions and extends to include polynomial, rational, radical, logarithmic, and other functions. Data analysis, statistics, and probability content should be included throughout the course, as students collect and use univariate and bivariate data to create and interpret mathematical models. Additionally, Analytical Algebra II should focus on the application of mathematics in various disciplines including business, finance, science, career and technical education, and social sciences, using technology to model real-world problems with various functions, using and translating between multiple representations. The eight Process Standards for Mathematics apply throughout the course. Together with the content standards, the Process Standards prescribe that students experience mathematics as a coherent, useful,
and logical subject that makes use of their ability to make sense of problem situations. This course is not recommended for students interested in pursuing a STEM degree at a four year institution; this course does not prepare students for PreCalculus/Trigonometry.

***Fulfills the Algebra II/Integrated Mathematics III requirement for all diplomas: if students use this course to fulfill this credit, the parent and student must sign a consent form notifying the parent and the student that enrollment in Analytical Algebra II may affect the student's ability to attend a particular post-secondary educational institution or enroll in a particular course at a particular post-secondary educational institution because Analytical Algebra II may not align with academic requirements established by the postsecondary educational institution. Teacher recommended.

Grade Level: 10-12  Pre-req: Algebra 1  Credits: 2 semester course, 1 credit per semester

2543 ADVANCED MATHEMATICS, SPECIAL TOPICS: SAT/ACT PREP
Advanced Mathematics, Special Topics is the course title that is to be used for reporting by schools that offer mathematics course beyond the scope of approved courses. Schools must apply to the Indiana Department of Education for a non-standards course waiver. The nonstandards course waiver will provide a proposed course description, standards students will meet for the course, how the special topics course relates to students' needs, and rationale describing post-secondary/higher education and business/industry need and support for the course. Schools will follow the special topics non-standards course waiver framework and provide feedback to the Indiana Department of Education at the end of the course.

Grade Level: 11-12  Pre-Req: Algebra II  Credits: 1 semester course, 1 credit per semester

2566/2546 TRIGONOMETRY/PROBABILITY AND STATISTICS
Trigonometry is the Semester One Course. This first semester course covers basic Trig concepts as directed by state standards.
Probability is the Semester Two Course. This second semester course covers basic Probability/Statistics concepts as directed by the state standards.

Grade Level: 11-12  Prerequisite: Algebra II

2564 TRIGONOMETRY/PRE-CALCULUS
This two-term course covers material which includes functions common in calculus including algebraic, logarithmic, and trigonometric functions. Many algebraic/geometric connections are made in this course. It is recommended for students entering a science, engineering or math career.

Dual Credit option OCU 1st semester MATH 120, 2nd semester MA 115

Grade Level: 11-12  Prerequisite: Algebra II

2564H TRIGONOMETRY HONORS/PRE-CALCULUS HONORS
This course is for recommended students only. Students who complete Algebra II or Algebra II Honors with a letter grade of “A” are eligible for this course. This is a faster paced course.

Grade level: 10-11

Dual Credit option OCU 1st semester MATH 120, 2nd semester MA 115

* This course is weighted/using 4.5 grading scale.

2562 AP CALCULUS AB, ADVANCED PLACEMENT
This two-term course is rigorous and requires a devoted, interested math student to be successful. It is recommended for the student who excelled (Grade A to B) in Pre-Calculus or Honors Algebra II. The course will follow the College Board AP Calculus AB description. All students will take the AP Calculus AB Test in May for potential college credit.

Grade Level: 12  Prerequisite: Pre-Calculus

2572 AP CALCULUS BC, ADVANCED PLACEMENT
AP Calculus BC is a course based on content established by the College Board. AP Calculus BC is primarily concerned with developing the students’ understanding of the concepts of calculus and providing experience with its methods and applications. The course emphasizes a multi-representational approach to calculus, with concepts, results, and problems being expressed graphically, numerically, analytically, and verbally. The connections among these representations also are important. Topics include: (1) functions, graphs, and limits; (2) derivatives; (3) integrals; and (4) polynomial approximations and series. Technology should be used regularly by students and teachers to reinforce the relationships among the multiple representations of functions, to confirm written work, to implement experimentation, and to assist in interpreting results.

Dual Credit option OCU MATH 216

Grade Level: 12  Prerequisite: AP Calculus AB
Multidisciplinary

0500  BASIC SKILL DEVELOPMENT
Basic Skills Development is a multidisciplinary course that provides students continuing opportunities to develop basic skills including: (1) reading, (2) writing, (3) listening, (4) speaking, (5) mathematical computation, (6) note taking, (7) study and organizational skills, and (8) problem-solving skills, which are essential for high school course work achievement. Determination of the skills to be emphasized in this course is based on Indiana’s standards, individual school corporation general curriculum plans, and the student’s Individualized Education Programs (IEP) or other individualized plans. Skills selected for developmental work provide students with the ability to continue to learn in a range of different life situations.
Grade Level: 9-12  Credits: 1 credit per semester up to 8 semesters, 8 credit max

0522  JOBS FOR AMERICA’S GRADUATES (JAG)
This course provides students with opportunities to learn about themselves and about various traditional and nontraditional occupations and careers. Students also gain an awareness of the type of occupational preparation or training needed for various occupations and careers. Students develop skills in: (1) employability, (2) understanding the economic process, and (3) career decision making and planning. Opportunities are provided for students to observe and participate in various job situations through field trips, internships, mock interviews, and guest speakers. Resume development experience and career-related testing are also provided to students.
Grade Level:  Placed by administrative referral.

NC100  STUDY HALL
This is a non-credit class. Juniors and seniors may take the class if credit count allows. May be replaced by a required course at guidance counselor discretion. Sophomores and freshmen must have parent and administrative approval.

Music

4160  CONCERT BAND
This class will focus on the fundamental techniques of wind player development. Wind literature of all facets will be absorbed and studied throughout the course. Students will perform in multiple facets of the music department including marching band, pep band, winter/spring concerts, organizational contest, etc.
Grade Level:  9-12

4200  APPLIED MUSIC/ PERCUSSION TECHNIQUES (Formerly Jazz Band)
Percussion students of PCHS only may enroll in this class with consent of Band Director. Students must have a prerequisite of a previous experience in a band class/ensemble (i.e. 8th grade band, concert band, jazz band, marching band, pep band, or by specific invitation from the director).
Grade Level:  9-12

4206  MUSIC HISTORY & APPRECIATION
This one semester class explores the nature of music and major musical style periods. This class includes listening to and discussing music of many forms. This is a non-performance based music class. Multiple genres of musical study will be explored. Students will also learn to understand the functions of musical scores as well as many different cultures around the world.
Grade Level:  9-12

4208  MUSIC THEORY AND COMPOSITION
Students develop skills in the analysis of music and theoretical concepts. They develop ear training and dictation skills, compose works that illustrate mastered concepts, understand harmonic structures and analysis, understand modes and scales, study a wide variety of musical styles, study traditional and nontraditional music notation and sound sources as tools for musical composition, and receive detailed instruction in other basic elements of music. • Recommended Grade Level: 9, 10, 11, or 12 • Credits: a 1 or 2 semester course for 1 credit each semester. The nature of this course allows for two successive semesters of instruction, provided that defined standards are utilized. • Fulfills requirement for two Fine Arts credits (if taken for 2 semesters) for Core 40 with Academic Honors diploma • Counts as a Directed Elective or Elective for the General, Core 40, Core 40 with Academic Honors and Core 40 with Technical Honors diplomas

4182  FRESHMEN CHOIR (Beginning Chorus)
Students develop musicianship and specific performance skills through ensemble and solo singing. This class includes the study of quality repertoire in the diverse styles of choral literature appropriate in difficulty and range for
the students. Chorus classes provide opportunities for performing, creating, and responding to music. Students develop the ability to understand and convey the composer's intent in performance of music. Time outside of the school day may be scheduled for rehearsals and performances. A limited number of public performances may serve as a culmination of daily rehearsal and musical goals. Students may be required to participate in performance opportunities outside of the school day that support and extend learning in the classroom.

4186  CONCERT CHOIR (Intermediate Chorus)
The scope of this class will be to rehearse and perform varying types of literature suitable for intermediate level choir and different aspects of singing and reading music, along with other music related topics. This class is open to any student wishing to sing in a choir. Additional music fee required. No audition.
Grade Level: 10-12

4188  VARSITY SINGERS (Advanced Chorus)
Placement audition and instructor approval necessary. This class requires evening rehearsals and performances and a few weekend performances. This will constitute part of the earned grade. This class will encompass varying types of literature suitable for concert choirs and show choirs, different aspects of singing and reading music, and dance and choreography. Open to any student (9-12) who successfully passes the audition. Participation in ISSMA solo and ensemble required.
Grade Level: 10-12 Required: Audition and additional music fee

4180  INNOVATIONS – (Ladies only, may include males if enough interest)
This class requires evening rehearsals and performances and weekend performances. This will constitute part of the earned grade. The scope of this class will be to rehearse and perform varying types of literature suitable for female show choirs, different aspects of singing and reading music, and choreography and dance. Open to any student who successfully passes the audition. Solo/ensemble required. Males may participate depending upon the number interested.
Grade Level: 10-12 or Instructor Recommendation Required: audition and music fee

Physical Education

3542  PHYSICAL EDUCATION
This full-year course satisfies the graduation requirement of 2 credits in PE. Will include, but is not limited to, an introduction to Team Sports, Lifetime Sports, Strength and Conditioning, and Personal Fitness. Credit: 1 each semester.
Grade Level: 9 THIS COURSE IS A CO-ED COURSE

3660  PHYSICAL EDUCATION CREDIT FOR ATHLETIC PARTICIPATION
Credit may be awarded upon head coach, athletic department, and building principal approval after fulfilling all requirements for a fall, winter, or spring PCHS sport. The credit is allowed to count as one physical education, graduation requirement credit. Athletics recognized: Football, Volleyball, Cross Country, Soccer, Tennis, Golf, Marching Band, Guard or Flag Corps, Basketball, Wrestling, Track and Field, Baseball, Softball, Cheerleading

Application for credit must be made before or during the season by completing the written request in the Guidance Office. The form must be signed by the parent/guardian and by the school administration. The head coach of the sport, or sponsor of the activity must certify that the activity meets the guidelines provided by the State of Indiana and PCHS including, but not limited to satisfactory completion of the sport or activity and full participation in the practices and contests prescribed by the school and its Athletic Office or Music Sponsor.

PCHS and the NGSC reserve the right to grant or refuse credit for the outside activities to reflect updates in the curriculum requirement by the Department of Education or the school. Activities that qualify may be added or deleted without notice.
Grade Level: 9-12

3560  STRENGTH AND CONDITIONING - ELECTIVE PHYSICAL EDUCATION
The goal of this semester course is to develop a physically educated student who can maintain appropriate levels of cardio-respiratory endurance, muscular strength and endurance, flexibility, and body composition necessary for a healthy and productive life. Students have an opportunity to develop an appropriate fitness program that enables them to achieve a desired level of fitness. Leadership skills will be developed through team-building exercises and helping others on a daily basis. Ongoing assessments will include written and skill based evaluations. Students wishing to enroll must complete an application. Co-ed. Can be taken more than once. Credit: 1 each semester
Grade Level: 10-12 This course does NOT fulfill a PE requirement.
**Freshmen athletes wishing to enroll in Strength and conditioning must complete a summer workout regimen and must have approval by supervising instructor.**

Prerequisite: Intro to PE I and II and Instructor approval.

3544  ADVANCED PE - ELECTIVE PHYSICAL EDUCATION
Will include detailed units covering basketball, European handball, fitness testing, football, hockey, soccer, softball, and volleyball, archery, badminton, pickle ball, table tennis, tennis, and wiffle ball.
Can be taken more than once. Credit: 1 each semester CO-ED
Grade Level: 10-12 Prerequisite: Intro to PE I and II

3506  HEALTH AND WELLNESS EDUCATION
Health and Wellness is a study of nutrition, physical fitness, tobacco and alcohol prevention, and all major body systems. The Alive at 25 defensive driving program will also be implemented. Emphasis is on application of knowledge through the use of decision-making and behavior modification skills.
Grade Level: 9-12 One-semester required class.

Science

3020  AP BIOLOGY
AP Biology is a course based on the content established and copyrighted by the College Board. The course is not intended to be used as a dual credit course. The major themes of the course include: The process of evolution drives the diversity and unity of life, Biological systems utilize free energy and molecular building blocks to grow, to reproduce and to maintain dynamic homeostasis, Living systems store, retrieve, transmit and respond to information essential to life processes, Biological systems interact, and these systems and their interactions possess complex properties. **Students will take AP Bio exam in May with the potential to earn a college credit.**
Grade Level: 11, 12 Pre-Req: Biology I and Chem I with a “C” or higher
Credits: 2 semester course, 1 credit per semester

3024  BIOLOGY I
A study of: Life characteristics, cell structure and processes, genetics/evolution, plant structure and development, ecology and embryonic development. Two projects are required (Plant Development and Chick Embryo Study). Involves lab activities that relate to course work. Required for graduation.
Grade Level: 9-12

3044  EARTH AND SPACE SCIENCE
This course is about the physical process that shapes the Earth. Students study the four branches of Earth Science, namely Geology, Meteorology, Astronomy, and Oceanography. These areas of study will help the student begin to develop a greater appreciation and understanding of the Earth as a natural resource.
Grade Level: 10-12 Prerequisite: Biology I

3108 INTEGRATED CHEMISTRY/PHYSICS
Laboratory science that combines the basic concepts of chemistry and physics. Generally the physics portion is covered during the first semester and the chemistry portion during the second semester. There is a greater emphasis on the conceptual and “hands-on” aspects of chemistry and physics, while there is less emphasis on the upper level mathematics of the individual courses. **Is intended for the student who does not plan to take regular Chemistry and/or Physics.**
Grade Level: 10-12 Prerequisite: Biology I  Does Not Count for AHD

3064  CHEMISTRY
Chemistry will introduce matter in all of its various combinations, such as elements, compounds, and mixtures, and how matter can be physically or chemically changed. Topics such as measurement, atomic theory, periodic trends, mathematics of chemistry, chemical bonding, inorganic and organic nomenclature, kinetic theory, acid-base theories and nuclear chemistry will be covered.
Grade Level: 10-12 Prerequisites: “B” grade in Algebra I required for enrollment in Grade 10, “C” grade in Algebra I required for enrollment in grades 11 and 12.

3066  CHEMISTRY II
Advanced Chemistry will provide an in-depth investigation of chemistry. Areas of study include a review of first year topics, thermo chemistry, thermo-dynamics, electrochemistry, organic, solid state chemistry, as well as quantitative and qualitative analysis. Laboratory activities and problem solving skills will be emphasized.
Dual Credit option USI CHEM 261
Prerequisite: “B” grade in Algebra I required for enrollment in Grade 10, “C” grade in Algebra I required for enrollment in grades 11 and 12.
Grade Level: 11-12 Prerequisite: “B” minimum in Chemistry I or teacher approval

3092 ADVANCED SCIENCE/ORGANIC AND BIOCHEMISTRY
This course is designed for allied health and nursing. It gives an introduction to many areas of chemistry that impact our society. The course will be broken into two parts: Organic Chemistry (Semester I) and Biological Chemistry (Semester II).

Dual Credit option USI CHEM 141
Requirement: Strongly recommended to take Chemistry II first.
Grade Level: 11-12 Prerequisite: “B” minimum in Chemistry I or teacher approval

3010 ENVIRONMENTAL SCIENCE
An interdisciplinary course that integrates biology, earth science, chemistry, and other disciplines. Students enrolled in this course conduct in-depth scientific studies of ecosystems, population dynamics, resource management, and environmental consequences of natural and anthropogenic processes. Students formulate, design, and carry out laboratory and field investigations as an essential course component. Students completing Environmental Science, Advanced acquire the essential tools for understanding the complexities of national and global environmental systems.
Grade Level: 10-12 Prerequisite: Biology I

3084 PHYSICS
Physics is the science that studies the nature of matter, energy and their relationships. This is an introductory physics course geared toward the college bound student. Hands on laboratory experiments and exercises are used to introduce and/or reinforce concepts. However, problem solving is the primary means of study. Students are led to understand the basis for each major physics concept.
Grade Level: 11-12 Prerequisite: Pre-Calculus or strong Algebra II students with teacher recommendation.

5274 MEDICAL TERMINOLOGY
Medical Terminology prepares students with language skills necessary for effective, independent use of health and medical reference materials. It includes the study of health and medical abbreviations, symbols, and Greek and Latin word part meanings, all taught within the context of body systems. This course builds skills in pronouncing, spelling, and defining new words encountered in verbal and written information in the healthcare industry. Students have the opportunity to acquire essential skills for accurate and logical communication, and interpretation of medical records. Emphasis is on forming a foundation of a medical vocabulary including; appropriate and accurate meaning, spelling, and pronunciation of medical terms, and abbreviations, signs, and symbols.
Grade Level: 11, 12 Credits: 2 semester course, 2 semesters required, 1 credit per semester, 2 credits max

5276 ANATOMY AND PHYSIOLOGY
Anatomy & Physiology is a course in which students investigate concepts related to Health Science, with emphasis on interdependence of systems and contributions of each system to the maintenance of a healthy body. It introduces students to the cell, which is the basic structural and functional unit of all organisms, and covers tissues, integument, skeleton, muscular and nervous systems as an integrated unit. Through instruction, including laboratory activities, students apply concepts associated with Human Anatomy & Physiology. Students will understand the structure, organization and function of the various components of the healthy body in order to apply this knowledge in all health related fields.

Dual Credit option USI BIOL 105
Grade Level: 11, 12 Pre-Req: Chem 1 with a grade of “C” or better
Credits: 2 semester Course, 2 semesters required, 1 credit per semester, 2 credits max

5218 PLTW PRINCIPLES OF BIOMEDICAL SCIENCES
PLTW Principles of the Biomedical Sciences provides an introduction to this field through “hands-on” projects and problems. Student work involves the study of human medicine, research processes and an introduction to bioinformatics. Students investigate the human body systems and various health conditions including heart disease, diabetes, hypercholesterolemia, and infectious diseases. A theme through the course is to determine the factors that led to the death of a fictional person. After determining the factors responsible for the death, the students investigate lifestyle choices and medical treatments that might have prolonged the person’s life. Key biological concepts included in the curriculum are: homeostasis, metabolism, inheritance of traits, feedback systems, and defense against disease. Engineering principles such as the design process, feedback loops, fluid dynamics, and the relationship of structure to function will be included where appropriate. The course is designed to
provide an overview of all courses in the Biomedical Sciences program and to lay the scientific foundation necessary for student success in the subsequent courses. In May students will take an exam; depending on their score they can apply for a dual credit option through IUPUI.

Grade Level: 9-12  Pre-reqs: Biology I or concurrent enrollment in Biology I  
Credits: 2 semester course, 2 semesters required 1 credit per semester, 2 credits maximum

5282 HEALTH SCIENCE EDUCATION I
Health Science Education I is a course designed to provide a foundation of skills development to specific health careers including: patient care, nursing care, dental care, animal care, medical laboratory, and public health. Students will also receive an introduction to healthcare systems, anatomy, physiology, and medical terminology. Laboratory experiences with industry applications are organized and planned around the activities associated with the student's career objectives. Job seeking and job maintenance skills, personal management skills, self-analysis to aid in career selection and completion of the application process for admission into a post-secondary program of their choice are also included in this course. Participation in HOSA 116 Indiana Department of Education High School Course Titles and Descriptions encourages the development of leadership, communication and career related skills, and opportunities for community service.  
Grade Level: 11  Credits: 2 semester course, 2 semesters required, 1-3 credits per semester, 6 credit max

Social Studies

1508 CITIZENSHIP AND CIVICS
Citizenship and Civics is an overview of citizenship roles and responsibilities designed to help students become independent thinkers and conscientious citizens. This course deals with political trends and behavior which citizens consider to be relevant to the most pressing issues of the day. The course provides students experiences that will develop attitudes of citizenship within a democratic society. Topics include: (1) the policymaking process, (2) public participation in policymaking, (3) citizenship rights and responsibilities in a changing society, and (4) the relationship between modern society and government. Study of the local government should be a component of this course.  
Grade Level: 9-12

1548 WORLD HISTORY
This full year course is a global look at the important people, events, and cultures that have shaped the world. Topics will range from Ancient Greece and Rome to the Cold War.  
Grade Level: 10-12  PCHS Requirement

1542 US HISTORY
Two semesters required for graduation. The first semester provides a survey of the major events, peoples and trends of American history from the Civil War through the end of the 19th century. The second semester surveys America during the 20th century with a major emphasis on those events, people, and trends that are influencing our lives today.  
Grade Level: 11 (Required)

1542H US HISTORY HONORS
This course is for recommended students only. Students can be recommended by their World History or English teachers. Signature is needed by the US History instructor.  
Grade Level: 11

1540 GOVERNMENT
United States Government provides a framework for understanding the purposes, principles, and practices of constitutional representative democracy in the United States. Responsible and effective participation of citizens is stressed. Students understand the nature of citizenship, politics, and governments and understand the rights and responsibilities of citizens and how these are part of local, state, and national government. Students examine how the United States Constitution protects rights and provides the structure and functions of various levels of government. How the United States interacts with other nations and the government’s role in world affairs will be examined. A focus on American interactions with other nations, and the government’s role in world affairs, will also be included. Using primary and secondary resources, students articulate, evaluate, and defend positions on political issues. As a result, they will be able to explain the role of individuals and groups in government, politics, and civic activities and the need for civic and political engagement of citizens in the United States.  
Grade Level: 12 (Required)
1514  ECONOMICS

*Economics* examines the allocation of resources and their uses for satisfying human needs and wants. The course analyzes the economic reasoning and behaviors of consumers, producers, savers, investors, workers, voters, institutions, governments, and societies in making decisions. Students explain that because resources are limited, people must make choices and understand the role that supply, demand, prices, and profits play in a market economy. Key elements of the course include study of scarcity and economic reasoning, supply and demand, market structures, the role of government, national economic performance, the roles of financial institutions, economic stabilization, and trade.

Grade Level: 12 (Required)

1540H  GOVERNMENT HONORS

This one semester course examines the operations of the various branches and levels of American Government from local to federal. It also provides knowledge of the various types of government found in the world. The course will examine the democratic principles that make up the foundation of the United States Government. Ideology of political influence and its effect on the economy in the United States will also be a large part of this course.

Grade Level: 12

1514H  ECONOMICS HONORS

Economics examines the allocation of resources and their uses for satisfying human needs and wants. The course analyzes the economic reasoning and behaviors of consumers, producers, savers, investors, workers, voters, institutions, governments, and societies in making decisions. Students explain that because resources are limited, people must make choices and understand the role that supply, demand, prices, and profits play in a market economy. Key elements of the course include study of scarcity and economic reasoning, supply and demand, market structures, the role of government, national economic performance, the roles of financial institutions, economic stabilization, and trade.

Grade Level: 12

1516  ETHNIC STUDIES

This is a one-semester course. Ethnic Studies provides opportunities to broaden students’ perspectives concerning lifestyles and cultural patterns of ethnic groups in the United States. This course will either focus on a particular ethnic group or groups, or use a comparative approach to the study of patterns of cultural development, immigration, and assimilation, as well as the contributions of specific ethnic or cultural groups. The course may also include analysis of the political impact of ethnic diversity in the United States. • Recommended Grade Level: none • Recommended Prerequisites: none • Credits: 1 semester course, 1 credit • Counts as an Elective for all diplomas

1518  INDIANA STUDIES

This is a one-semester course. Indiana Studies is an integrated course that compares and contrasts state and national developments in the areas of politics, economics, history, and culture. The course uses Indiana history as a basis for understanding current policies, practices, and state legislative procedures. It also includes the study of state and national constitutions from a historical perspective and as a current foundation of government. Examination of individual leaders and their roles in a democratic society will be included and student will examine the participation of citizens in the political process. Selections from Indiana arts and literature may also be analyzed for insights into historical events and cultural expressions. • Recommended Grade Level: none • Recommended Prerequisites: none • Credits: 1 semester course, 1 credit • Counts as an Elective for all diplomas

1534  SOCIOLOGY

*Sociology* allows students to study human social behavior from a group perspective. The sociological perspective is a method of studying recurring patterns in people’s attitudes and actions and how these patterns vary across time, cultures, and in social settings and groups. Students describe the development of sociology as a social science and identify methods of research. Through research methods such as scientific inquiry students examine society, group behavior, and social structures. The influence of culture on group behavior is addressed through institutions such as the family, religion, education, economics, community organizations, government, and political and social groups. The impact of social groups and institutions on group and individual behavior and the changing nature of society will be examined. Influences on group behavior and social problems are included in the course. Students also analyze the role of individuals in the community and social problems in today's world. • Only open to Juniors and Seniors, only available to 44 total students in 2 class periods

1532  PSYCHOLOGY

Psychology is the scientific study of mental processes and behavior. The course is divided into eight content areas. History & Scientific Method explores the history of psychology, the research methods used, and the ethical considerations that must be utilized. Biological Basis for Behavior focuses on the way the brain and nervous system
function; including sensation, perception, motivation and emotion. Development looks at all the changes throughout one’s life: physical, cognitive, as well as emotional, social and moral development. Cognition focuses on learning, memory, information processing, and language development. Personality and Assessment looks at the approaches used to explain one’s personality and the assessment tools used. Abnormal Psychology explores psychological disorders and the various treatments used for them. Socio-Cultural Dimensions of Behavior covers topics such as conformity, obedience, perceptions, attitudes and influence of the group on the individual. Psychological Thinking explores how to think like a psychologist and expand critical thinking skills needed in the day-to-day life of a psychologist.

Grade Level: 10 (with 3.5 minimum GPA), 11, 12

**Theatre**

42421/42422 THEATRE ARTS and ADVANCED THEATRE ARTS
Each is a one semester class. Read and analyze plays, create scripts and theatre pieces, conceive scenic designs, and develop acting skills. These activities incorporate elements of theatre history, culture, analysis, response, creative process, and integrated studies. Additionally, students explore career opportunities in the theatre, attend and critique theatrical productions, and recognize the responsibilities and the importance of individual theatre patrons in their community.

Grade Level: 9-12*

42443/42444 TECHNICAL THEATRE and ADV TECHNICAL THEATRE
Each is a one semester class. Actively engage in the process of designing, building, managing, and implementing the technical aspects of a production – including set construction, lighting and sound. These activities should incorporate elements of theatre history, culture, analysis, response, creative process, and integrated studies. Additionally, students explore career opportunities in the theatre, attend and critique theatrical productions, and recognize the responsibilities and the importance of individual theatre patrons in their community.

Grade Level: 9-12*

The progression of taking Theatre classes are as follows: 1-Theatre Arts, 2- Advanced Theatre Arts, 3-Tech Theatre, 4-Advanced Tech Theatre. All four levels are offered each semester.

**World Languages**

** Three years of World Language (Spanish only language offered at PCHS) is required for Academic Honors Diploma. Also, at least two years recommended for state college acceptance.

2120 SPANISH I
A one-year introductory course in Spanish which stresses the development of proficiencies in reading, writing, listening and speaking, introduces basic grammar and vocabulary, and seeks to develop in the student an appreciation for the culture and history of Spanish-speaking countries.
Recommendations: Grade of “C” or above in English; Grade of “B” or above in English for incoming freshmen.

Grade Level: 9-12

2122 SPANISH II
A one-year course that builds on the basic skills developed in Spanish I, further developing the student’s proficiency in areas such as grammar, vocabulary, oral/written communication and knowledge about the Spanish-speaking world.

Grade Level: 10-12 Prerequisite - Grade of “C” or above in Spanish I and teacher permission.

2124 SPANISH III
Spanish III, a course based on Indiana’s Academic Standards for World Languages, builds upon effective strategies for Spanish language learning by facilitating the use of the language and cultural understanding for self-directed purposes. This course encourages interpersonal communication through speaking and writing, providing opportunities to initiate, sustain and close conversations; exchange detailed information in oral and written form; and write cohesive information with greater detail. This course also emphasizes the continued development of reading and listening comprehension skills, such as using cognates, synonyms and antonyms to derive meaning from written and oral information, as well as comprehending detailed written or oral directions. Students will address the presentational mode by presenting student-created material on a variety of topics, as well as reading
aloud to practice appropriate pronunciation and intonation. Additionally, students will continue to develop understanding of Spanish-speaking culture through recognition of the interrelations among the practices, products and perspectives of the target culture; discussion of significant events in the target culture; and investigation of elements that shape cultural identity in the target culture. This course further emphasizes making connections across content areas as well the application of understanding Spanish language and culture outside of the classroom.

- Recommended Grade Level: 11-12
- Prerequisite: Grade of “C” or above in Spanish II and teacher permission

2126 SPANISH IV
SPAN IV expands the skill sets that apply to the exchange of written and oral information through emphasis on practicing speaking and listening strategies that facilitate communication. The use and influence of the Spanish language and culture in the community beyond the classroom is explored through the identification and evaluation of resources intended for native Spanish speakers. Furthermore, students will use authentic literature for study of culture and expansion of language structures. In addition, this course includes a comprehensive review of Spanish grammar as well as expand on previous knowledge in order to prepare students for placement tests and collegiate-level Spanish. This course is being offered as a dual credit course through OCU>

- Recommended Grade Level: 11-12
- Prerequisite: Grade of “B” or above in Spanish III and teacher permission or at teacher’s discretion
